Hiring Manager

Systems Nakashima Co., Ltd.

Re: **AI Model Building and Inference System Construction Trainee Application**

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the AI Model Building and Inference System Construction training program at Systems Nakashima Co., Ltd. As an Information Technology engineering candidate with strong foundations in full-stack web development, database management, and API design, I am eager to contribute to your digital transformation initiatives while deepening my practical expertise in Tokyo.

During my internship as a Back End Developer at Horizon View, I engineered scalable backend architectures, Firestore database structures, and REST APIs for an ERP platform supporting over 2,000 users. Additionally, through my full-stack projects such as Casca and LookBack, I built web applications leveraging Next.js and Node.js while integrating third-party AI APIs and data pipelines into production environments. These experiences closely align with Systems Nakashima's focus on connecting web application frameworks, database storage, and REST APIs with AI technologies.

I am eager to bring my background in Python, JavaScript, and software engineering to your technical team and contribute to recreating core product features and processing system data. I welcome the opportunity to discuss how my technical preparation and dedication to AI systems can support Systems Nakashima Co., Ltd.

Sincerely,

Charis Fernandes
