Hiring Manager

Systems Nakashima Co., Ltd.

Re: **Training on AI Model Building and Inference System Construction Application**

Dear Hiring Manager,

I am writing to express my strong enthusiasm for the Training on AI Model Building and Inference System Construction position at Systems Nakashima Co., Ltd. Holding a Bachelor of Engineering in Information Technology and practical background in full-stack web application development, REST APIs, and database logic, I am deeply aligned with Systems Nakashima's mission to drive digital transformation and integrate AI to solve real-world challenges.

During my backend development internship at Horizon View, I engineered scalable REST APIs and Firestore database logic for an ERP system serving over 2,000 active users. Additionally, in my full-stack projects such as Casca and LookBack, I incorporated AI pipelines into web and mobile platforms, ensuring efficient interaction between user interfaces and system databases. While my prior AI projects focused primarily on web framework and API integrations, I am eager to learn ONNX model conversion and browser-based AI inference directly within your engineering workflow, as well as deepen my Japanese language proficiency.

I am confident that my technical foundation in Python, JavaScript, Java, and database systems will allow me to contribute effectively to your web application recreating tasks and inference systems. Thank you for considering my application, and I look forward to discussing how my software engineering background can support Systems Nakashima Co., Ltd.

Sincerely,

Charis Fernandes
