Hiring Manager

Softel Technologies Incorporation

Re: **Software Testing & Flutter Intern Application**

Dear Hiring Manager,

I am writing to express my strong interest in the Software Testing & Flutter Internship at Softel Technologies Incorporation in Goregaon East, Mumbai. As a final-year Information Technology engineering student at St. Francis Institute of Technology with practical experience developing and debugging web and mobile applications, I am eager to help ensure the quality and reliability of software solutions like Way2Society.com.

Through my backend internship at Horizon View and projects like LookBack (a React Native mobile application), I have gained strong hands-on experience in REST API testing with Postman, state management debugging, and structured error handling. Additionally, my IELTS Academic score of 7.5 reflects clear technical communication skills, equipping me to document bugs accurately, coordinate with clients regarding reported issues, and collaborate efficiently with development teams.

I am based in Mumbai and available for the full 6-month in-office commitment. While my core mobile background is in React Native, I am particularly motivated to expand into Flutter and Dart under the guidance of your senior engineering team. Thank you for your consideration, and I look forward to discussing how my testing and development foundation can add value at Softel Technologies Incorporation.

Sincerely,

Charis Fernandes
