Hiring Manager

International Telecommunication Union (ITU)

Re: Junior Project Implementation Support Intern Position

Dear Hiring Team,

I am writing to express my strong interest in the Junior Project Implementation Support Intern role within the ITU Telecommunication Development Bureau. I confirm that I meet all stated criteria: I am under 30 years of age and currently enrolled in my Bachelor of Engineering in Information Technology at St. Francis Institute of Technology. I fully understand and accept that this internship is an unpaid training opportunity. I am prepared to commit to a full-time, 6-month remote internship starting within the next 30 to 60 days.

My academic background in IT and practical backend development experience align well with your requirement for process improvement, database maintenance, and digital tool creation. In my work on the Velocity ERP system at Horizon View, I structured backend database architecture using SQL, Firestore, and Node.js, providing dependable access for over 2,000 active users. My technical proficiency with Python, SQL, API integration, and workflow automation tools allows me to analyze complex datasets, build clear dashboard visualizations, and maintain structured information systems to support project tracking and reporting.

Contributing to ITU's global mandate of advancing digital development aligns directly with my goal to apply software engineering and data management principles to international initiatives. I look forward to discussing how my analytical skills and technical background can support your team's project monitoring and reporting activities. Thank you for your time and consideration.

Sincerely,

Charis Fernandes
