PROFESSIONAL SUMMARY

Information Technology engineering candidate with experience in backend software development, database architecture, and digital system integration. Demonstrated track record building platform infrastructure serving 2000+ users using Python, SQL, Next.js, and cloud databases. Skilled in data structuring, system reporting, and process automation, seeking to support project implementation and digital tool development at the ITU Telecommunication Development Bureau.

WORK EXPERIENCE

Full-time Intern as Back End Developer - Horizon View **OCT 2024 - MAY 2026**

- Built and maintained core database logic for the Velocity ERP system serving 2000+ students and 20+ instructors using Next.js and Firebase Firestore.
- Engineered RESTful APIs and role-based access controls to enforce data accuracy, security, and consistent user permissions across enterprise workflows.
- Structured system error handling and backend queries to improve data collection accuracy and streamline platform operations using SQL and Node.js.
